HONEYWELL AUTOMATION CERTIFICATION PROGRAM

Honeywell Academy, a leading expert in industrial workforce management, is pleased to introduce the Honeywell Automation Certification (HAC) Program. The program is designed for any Automation and Process Control professional who wishes to further their career in designing, implementing, administering, maintaining, and troubleshooting Honeywell Automation and Process Control systems.

Honeywell Certifications serve as tangible proof, showcasing that a learner has not just attended the course, but have acquired in-depth and specialized knowledge about Honeywell Systems.

Honeywell Automation certification program is helpful in preparation of wide range of roles like Process Control Engineer, Automation Engineer, System Administrator, Control Network Engineer, etc. It is available for Honeywell product - Experion Process Knowledge System (PKS) Systems, Total Plant Solution (TPS) Systems, and Safety Manager (SM/SMSC) Systems. It provides individuals with knowledge of the Honeywell systems, as well as Honeywell certification, Digital badging, and verified credentials valid across social media platforms.

FEATURES AND BENEFITS

- Develop Core Competencies of Automation and Process Control Professionals
- Advanced your career in Automation and Process Control
- Speak the language of professionals
- Improve your business performance
- Expertise with extensive learning over period of 9-10 months
- Multi-Level Learning
- 3 year certifications validity

PROGRAM OVERVIEW

This program journey is for “Associate to Expert”.

It provides:

- Overview of Honeywell Automation and Process Control Systems, Design and Implementation.
- System-based, in-depth knowledge and execution of activities for implementation, administration, maintenance, and troubleshooting.
- Practical demonstration of knowledge, execution handling of complex task, and validation of expertise in planning, design, operation, and optimization.

HONEYWELL AUTOMATION CERTIFIED ASSOCIATE (HACA)

Participants pursuing this level will have to demonstrate complete understanding of Honeywell systems network hierarchy and the various components that are present on each layer of the network, along with multiple business/process applications, as well as system performance and capabilities.

HONEYWELL AUTOMATION CERTIFIED PROFESSIONAL (HACP)

Participants pursuing this level will have to demonstrate in depth knowledge about an area of expertise and should be able to execute activities related to implementation, administration, maintenance, and basic troubleshooting of Honeywell systems.

HONEYWELL AUTOMATION CERTIFIED EXPERT (HACE)

This is the most prestigious certification you can obtain. Participants will have to demonstrate that they can handle execution of complex tasks and will validate activities from planning and design to operation, administration, and advanced troubleshooting of Honeywell systems.

WHAT IS INCLUDED?

- Training material related to Honeywell Systems
- Digital Badge shareable to social platform(s)
- Certificate
- 24/7 training content access
- Proctored Exam
- Mailbox query support
- Access to Webinars and Newsletters

RECOMMENDED FOR:

- For any Honeywell customers, including professionals that worked at Honeywell customer sites.
- Who wish to gain operations, implementation, maintenance, and administration through courses covering Process Control and Automation systems.
- **Certification Validity:** 3 Years.
- **Certification Renewal Options:** After 3 years, retake the course.

CERTIFICATION EXAMS:

- Register and take a proctored exam(s). This exam can be **In Person** or **Virtual**.
- You will need a score greater than or equivalent to **80%**.
- If a person fails, he/she will need to re-register for the proctored exam(s) within 90 days, paying an exam fee.
