

HONEYWELL ACADEMY

E-learning Subscription Program

E-Learning is taking the learning market by storm, stemming from its proven efficiency compared to traditional (classroom) methods. Industry market research find that E-learning provides:

Faster ramp up and rollout

No need to travel

Better knowledge retention

Higher focus during training

Honeywell Academy is at the forefront of digital learning. Learners are provided access to a variety of training formats and tools throughout their training journey. Our Asynchronous and Modular training courses are becoming ever more popular with an engaging user interface, quizzes, hands-on labs and real-time support from Honeywell Training Specialists.

Now, we are pleased to offer the entire library of our self-paced **E-learning** training courses to customers as a part of **annual subscription service**. The E-Learning Subscription program is offered in three convenient packages:

Express

Standard

Premium

HOW IT WORKS

1. The customer purchases the subscription pack and provides Honeywell Academy with the names and emails of the individuals to receive a license.
2. Each license in the pack will be assigned to nominated individuals from your organization. The licensee will be able to register for any AT (Asynchronous Training).
3. Each licensee will receive login details to Honeywell Academy Learning Management System. They can browse through the schedule of upcoming AT courses and enrol online.
4. Honeywell Academy will confirm their credentials and register them in that session.
5. After completing the course, they can download the certificate. They will be able register for the same course again or any other AT course as per their requirements, all covered in the subscription package.
6. The subscribers can access MT courses and several video lessons all the time.
7. One course registration at a time for AT courses.
